Neglected parameter, dimension, context
of this "problem" — foreign aggression,
occupation (in IV)

(Wg does it lead us often to

1) Dirty War, atrocities, torture?

2) stalemate, despite asymmetry of strength?

Context is ^{usually} imperialism

(or ethnic/regional conflict for power / autonomy / independence)

Imperialism: foreign domination, occupation

This motivates fierce, resolute, self-
renouncing (replacing great casualties),
tenacious (won't give up)

nationalist (ethnic: Ireland?)

struggle — willing to accept persistent
asymmetry in casualties (or torture)

(the technologically ^{+ numerically} "weaker" side (in actual numbers))

suffers disproportionate casualties —
only with "non-combatants"

(although it's not numerically weaker when its
"civil" "tail" is included)

For US combat forces, "tail" is 5x1
for combat troops;

might be larger, for guerrillas!
(see San Juan OB!)

Compare NLF + NVA combat units to
US combat units:

A reason for word for "10x1" ratio:
10 includes occupies "tail"!

esp. in Phils,
Hong, VN, Algeria

Poe an is to get locals to reign thanks
to foreign, imperial domination; to give up resistance
to accept local rules* chosen by
foreign, dependent on foreign, seeing

this, not "home"

This nationalist dimension gives the popular
sympathy that guerrillas or "terrorists" need
to persist (Stolent) — Tell foreigners
(go home) (giving devil "long/runner" domination
